Adil Boudida
Software Developer

I am a software developer who develops high-performance applications and web sites with organized architecture. I am also experienced in product design and customer relationships. I've worked with a wide range of people from different backgrounds and demographics. This enabled me to adapt and to be Flexible in the workplace. I work closely with development teams to guide the implementation, providing technical guidance, code reviews, and ensuring adherence to best practices and architectural guidelines.

Education

November 2018 to June 2021
Bachelor degree
Specialization: Computer Science
Rating: good

Expertise

- Web API
- Blockchain
- .NET
- Oracle Database
- Angular
- ReacJS
- Django
- Laravel

Languages

Arabic: Native

English: Expert

French: Expert

German: Advanced

Experience

January 2021 to Now
Database Developer | Dubai,UAE
Brains Field Technology CO Developer

-Dedicated and experienced Full-stack developer with a strong background in Brains Field Technology. Proficient in designing, developing, and maintaining AI applications to meet business needs. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.
- Blockchain developing proficient in TypeScript for the front end and Python Django for the back end I can also excel in creating smart contracts. These self-executing contracts are coded on blockchain platforms like Ethereum using Solidity or other smart contract languages.
- Furthermore, as a mobile developer, they can create mobile applications for iOS and Android platforms, expanding their capabilities to cater to a wide range of client needs.

April 2019 to June 2021
AL Mansoor Entreprises | WorldPress/React Developer | Dubai,UAE
Web Designer

-Optimize Web Pages Content For More Relevant Traffic And Higher Search Rankings.
My current field of activity includes the entire process of software development of systems and tools for applications and the implementation in different languages (especially Laravel, .NET Core, Java, JavaScript, SQL, HTML, CSS) and (NetBeans, MS Visual Studio Code). I also update and maintain existing systems, Developing and using skills and expertise in appropriate design packages such as Photoshop, In Design and After Effects.

Linux software | September 2018 to June 2021
University of Rabat | Linux software Developer
IT Developer

- Continuous Integration (CI), I harness tools such as Jenkins, Travis CI, and CircleCI to automate build and testing workflows. Containerization and Orchestration technologies like Docker and Kubernetes enable me to create portable and scalable environments
- I use Cloud Services like AWS, Azure, and Google Cloud are leveraged for scalable infrastructure. I utilize scripting and programming languages like Python, Ruby, and Shell scripting for automation scripts and CD pipelines.
- I use tools like SonarQube and OWASP ZAP. Container Registries such as Docker Hub and AWS ECR store and distribute container images, and Source Code Management is handled via platforms like GitHub and Bitbucket.
